# Colorectal Cancer Screening

Percentage of patients 50 through 75 years of age who had appropriate screening for colorectal cancer.

Patients 50-75 years of age with a visit during the measurement period.

## Denominator:
- Patient’s age is calculated based on the patient’s Date of Birth, which is entered when you created the patient’s account.

## Denominator Exclusions:
- If "Malignant Neoplasm of Colon" is documented in the Problem List, with a Start Date, these patients will be excluded from the numerator.
- If "Total Colectomy" is documented in Hospitalizations/Procedures History, these patients will be excluded from the denominator.
- Exclude patients whose hospice care overlaps the measurement period.

## Numerator:
- "Fecal Occult Blood Test (FOBT)" is ordered in Labs/Studies during the measurement period.
- "Flexible Sigmoidoscopy" is documented under Hospitalizations/Procedures History with a date that is during the measurement period or the four years prior to the measurement period. Or, it can also be documented in the Problem List with a Start Date.
- "Colonoscopy" is documented under Hospitalizations/Procedures History with a date that is during the measurement period or within the nine years prior to the measurement period.
- A "FIT-DNA" test order is created in Labs/Studies AND the order is submitted via eLabs.
- A "Ct Colonography" is documented under Hospitalizations/Procedures History with a date that is during the measurement period or within the nine years prior to the measurement period.

## Office Visit Documentation:
- Create a note detailing the patient’s office visit.
- Enter Procedure Codes including E/M Codes or CPT/HCPCS Codes on the Superbill.
- Complete and sign the note.

Once all steps have been completed, the measure will be added to the Quality Report.
